Aspiring AI/ML Engineer | B.Tech CSE (AI/ML)

Pursuing a B.Tech in Computer Science and Engineering (AI/ML) at NATIONAL INSTITUTE OF ELECTRONICS & INFORMATION TECHNOLOGY, with a strong foundation in machine learning and web development. Gained hands-on experience through internships at Cognifyz Technologies, focusing on data preprocessing, model development, and evaluation, and EISystems Technologies, where responsive websites and interactive user interfaces were developed using HTML, CSS, and JavaScript. Certified in fullstack web development, cutting-edge design trends, and generative AI, with a commitment to leveraging these skills for innovative technology solutions.

WORK EXPERIENCE

NEXT Tech Team	07/2026 – Present Rupnagar
Vaktavya – Public Speaking & Debate Club NIELIT Ropar Tech Team	08/2025 – Present Rupnagar
NATIONAL INSTITUTE OF ELECTRONICS & INFORMATION TECHNOLOGY (NIELIT) Member – Anti-Ragging Committee	08/2024 – Present Rupnagar

- Serving as a member of the Anti-Ragging Committee, contributing to maintaining a safe, respectful, and inclusive campus environment. Assisting in awareness initiatives, promoting anti-ragging policies, supporting student welfare activities, and helping ensure compliance with institutional guidelines.

Student Cognifyz Technologies Machine Learning Intern	Ropar, India 05/2026 – 06/2026
--	---

- During my internship at Cognifyz Technologies, I worked on diverse machine learning projects that involved data preprocessing, model development, and evaluation. I applied various algorithms to analyze datasets, generating predictive insights that addressed real-world problems. This experience allowed me to enhance my skills in Python and popular machine learning libraries while collaborating with mentors and team members.

EISystems Technologies Intern	06/2025 – 08/2025
--	--------------------------

- During my internship at EISystems Technologies, I gained hands-on experience in web development by building responsive websites and creating interactive user interfaces. I utilized HTML, CSS, and JavaScript to enhance user experience while debugging applications to ensure optimal performance. This role allowed me to implement modern web development practices in a dynamic environment.

EDUCATION

Degree in B.Tech CSE(AI/ML) NATIONAL INSTITUTE OF ELECTRONICS & INFORMATION TECHNOLOGY (NIELIT)	12/2028
Degree in 12, PCM Kendriya Vidyalaya (KV) • GPA: 89%	12/2022
Degree in 10 Kendriya Vidyalaya (KV) • GPA: 85%	01/2022

PROJECTS

CINEORA

A full-stack Movie Recommendation System powered by Machine Learning, built with Python, Flask, Node.js, and React, using the TMDB dataset for personalized movie suggestions.

NIELIT MERN Stack Website

Developed a full-stack institutional web platform using the MERN stack (MongoDB, Express.js, React.js, and Node.js). The system features secure user authentication, student assignment submission, teacher assignment management, and an administrative dashboard. Designed a responsive user interface and implemented RESTful APIs for seamless data management and communication between the frontend and backend.

NIELIT Python Web Application

Developed a dynamic web application using Python and Flask. Implemented user authentication, database integration, form handling, and responsive user interfaces. Designed backend functionality to manage user data efficiently while ensuring a seamless user experience across devices.

Personal Portfolio Website

Designed and developed a modern, responsive portfolio website to showcase my skills, projects, certifications, and professional journey. Built with a clean UI, interactive sections, and a contact form for networking and career opportunities.

TruthLens

AI-powered fact-checking platform that verifies claims using live news retrieval, TF-IDF semantic similarity, and an ONNX-optimized DistilBERT NLI model to detect misinformation with confidence scoring.

Velora

Velora is an AI-powered job verification and recommendation platform designed to combat fake listings and irrelevance in the job market. Built with React, Node.js, Express, and MongoDB, Velora leverages AI matching algorithms to analyze user resumes and connect candidates with tailored job opportunities. The

platform features Google OAuth 2.0 and JWT authentication, seamless resume uploading via Cloudinary, and saved job management—offering a secure, smart, and efficient career navigation experience.

PUBLICATIONS

A Comparative Study of Indoor Kitchen Air Quality and Outdoor Ambient Air Quality 01/2026 NICEDT

Co-authored and presented the research paper “A Comparative Study of Indoor Kitchen Air Quality and Outdoor Ambient Air Quality” at NICEDT-2026, the 4th NIELIT’s International Conference on Communication, Electronics and Digital Technologies, organized by NIELIT, Gorakhpur. The paper focuses on comparative analysis of indoor kitchen air quality and outdoor ambient air quality.

SKILLS

Conflict Resolution, FastAPI, Leadership, MERN Stack, Team Collaboration, Web Scrapping
